## EDUCATION

### THE STATE SCHOOL OF HIGHER EDUCATION IN CHELM

B.S. IN MATH AND COMPUTER SCIENCE 2010 - 2013 | Chelm, Poland

## SKILLS

### PROGRAMMING

bash • Python  
C • Golang

### CLOUD

**AWS** - CloudFormation, Lambda (Python), RDS, S3, DNS, VPC  
**GCP** - GKE (k8s), VMs, CloudBuild, MemoryStore, CloudSQL, StackDriver  
**Azure** - VMs, RGs, OMS (Logging & Monitoring), SQL, Storage

### TECH

Linux/Unix, Docker, Kubernetes, LXC, KVM, Ansible, DNS, LDAP, HTTP, SMTP, HA/Fail-Over, Monitoring, Git, Networking.

### CERTIFICATES

SAA-CA02 - AWS Certified Solutions Architect - Associate  
HashiCorp Terraform Associate  
CKA - Certified Kubernetes Administrator  
AZ-900 - Azure Fundamentals  
Novell Certified Linux Administrator 11  
Red Hat Certified System Administrator 7 (expired)  
Red Hat Certified Engineer 7 (expired)

## EXPERIENCE - (LAST 5 YEARS)

### EPSYHEALTH | DEVOPS ENGINEER (CONTRACT) Jan 2021 - Today, London, UK

Epsy is a leading digital health platform, on a mission to accelerate the path to optimal treatment for everyone living with epilepsy.

I've built new infrastructure from scratch as a sole DevOps Engineer.

Completely new networking stack, IAM roles, ECS and Iaas and GitHub Actions as a CI/CD.

Tech Stack: **AWS** (Amplify, DynamoDB, Peering, Multi-region, RDS, API Gateway, Cognito, Serverless, ECS, WAF, Route53, Network Firewall, IAM with SSO) Terraform Cloud, GitHub Actions, Sentry

### COGNIFLARE | DEVOPS ENGINEER (CONTRACT) Aug 2020 - Dec 2020

Working for the GlaxoSmithKline on behalf of Cogniflare

I was working on a greenfield project to prepare infrastructure for the Big Data.

Tech Stack: **Azure CLI**, PowerShell, JSON, YAML, Azure DevOps, Azure ARM Templates

### LIFEWORCS | SNR DEVOPS ENGINEER (CONTRACT) Nov 2019 - May 2020, London, UK

LifeWorks is a well-being platform that is being used by more than 15 thousands companies.

Working on **AWS Infrastructure** that's been spread between many accounts and regions. CI/CD was done using different providers (depends on the team). A lot of native AWS services are in use:

**SNS, SQS, DynamoDB, ECS, Athena, RDS, API Gateway, CloudFront, Lambda**

Tech Stack: **Ansible, Terraform 0.11 / 0.12, Jenkins, Bamboo, CircleCI, Serverless, MongoDB, Docker**

### DAYE | DEVOPS ENGINEER (CONTRACT) Jul 2019 - Nov 2019, London, UK

Bootstrapped infrastructure on **GCP** using **Kubernetes (GKE), Terraform, Cloud Run**.

CI/CD to **Cloud Run / Kubernetes** using **Cloud Build + GitHub**.

I've developed few backend apps using **Python/Flask** that are used in production environment.

### LEGAL AID AGENCY - MOJ | DEVOPS Sep 2018 - Jun 2019, London, UK

Providing support and maintenance for new LAA Infrastructure. Daily code-reviews and often production deployments. One of my biggest internal projects here was to **migrate old FTP fleet into AWS Lambda and S3 using Python**. Migration of **services/networking** from **Atos** into **AWS**.

Tech Stack: **Fully based on AWS: EC2, ECS, CloudFormation, Lambda, RDS, S3**

### HMCTS - MOJ | DEVOPS Mar 2017 - Sep 2018, London, UK

During my time at HMCTS I've been working on couple of internal projects:

Migrating **Cloud Atlassian** to **On-premise**

Planning and configuring **new infrastructure** for internal **ROTA** service

Worked on **new Online Plea** infrastructure

Worked on **migration from UKCloud to Azure**

Tech Stack: **Azure, Ansible, Jenkins 1/2, Terraform, Gerrit, Zabbix, ELK, AppDynamics, Wildfly, Artifactory, Artemis, PostgreSQL**

### AUTOMATION LOGIC | ENGINEERING CONSULTANT Mar 2017 - Jun 2019, London, UK

Consultant Engineer working for **GOV.UK** organisations

### STORAGE MADE EASY | DEVOPS / SENIOR DEVOPS

Jun 2015 - Aug 2016, London, UK as DevOps

Sep 2016 - Mar 2017, London, UK as Snr DevOps

At SME I've been working on introducing DevOps methodology to the Dev team. I've migrated old File Fabric appliance from **CentOS 5** into **CentOS 7** (w/o docs). The whole cycle of building appliance has been automated using **Ansible**. I've been providing Level 3 support for our customers as well as planning the infrastructure for new customers.

Stack: **LAMP, Ansible, Haproxy, Memcached, KVM, AWS, GCE, Azure, OpenStack, Ceph, Docker, VMware, Python, Juju**
